MEMORANDUM

TO:

State Board of Regents

FROM:

David L Buhler

SUBJECT:

USHE – FY 2015 Capital Improvement Funding Update

Issue

The Building Board met on April 21, 2014 and allocated the amount of \$54,740,698 for USHE Capital Improvement (CI) needs in FY 2015. State agencies, colleges, and universities work collaboratively with DFCM to identify and prioritize their capital improvement needs. The materials that follow provide additional information about the process used to acquire and allocate these funds and their intended use.

Background

As defined by statute, capital improvement projects include those facilities and infrastructure projects that cost less than \$2.5 million. For the first time in several years the Legislature funded the statutory requirement of 1.1%. In addition, statutory language for calculation of the CI pool was amended to add non-building infrastructure to the replacement cost base used to determine the amount provided each year. It is expected that this change will result in significant increases in CI funding in the future.

The statewide funding provided for FY 2015 is a \$12.5 million increase over the prior year, another significant improvement from the low funding levels resulting from the recessionary years. And while capital improvement needs continue to exceed the funding provided, these are significant steps forward in mitigating the ongoing deterioration in the care of USHE facilities.

While the legislature did not directly provide funding for the remaining utilities infrastructure needs of the University of Utah, the Legislative expression of intent and the subsequent Building Board allocations of the FY 2015 Capital Improvement funds provides \$13.5 million for that purpose, with an additional \$13.6 million to be provided in FY 2016. In addition, the Legislature authorized the issuance of a \$32 million revenue bond to fund the auxiliary enterprise portion of this project. With these actions, provision of the final funding for this important project is now in place.

The materials that follow include: (1) a summary of the process used by DFCM to arrive at their allocations; (2) a five year summary of capital improvement funding; and (3) the detail of the projects requested and funded for USHE institutions.

Commissioner's Recommendation

SUMMARY OF BUILDING BOARD ALLOCATION GUIDELINES AND PROCEDURES

- Statutory language provides funding based on a percentage of the replacement cost of existing state facilities. While the procedures used by the State Building Board still allow for the use of the percentage each state agency's facilities total is of the statewide total as a guideline in the allocation of these funds, the Legislature has adopted new statutory requirements and intent language to direct the Building Board to use prioritization procedures that assure that the most critical needs be given the highest priority consideration. In summary the requirements are:
 - The statute stipulates that, effective July 13, 2013, at least 80% of the funds appropriated are to be used for maintenance and repair of existing buildings or facilities and that no more than 20% may be used for remodeling and aesthetic upgrades to meet State programmatic needs or to construct an addition to an existing building. The statute does allow the Building Board to modify these requirements if it determines that a different allocation is in the best interests of the state.
 - Legislative intent called for a new scoring process to be used by the Building Board in allocating the funds that identifies and funds the most serious issues before consideration of funding for other needs.

While, in practice, this is not expected to radically change the collaborative process of the State Building Board and USHE institutions working together to determine the projects to be funded at each institution, it represents a serious concern by the Legislature to assure that the most threatening problems are addressed.

The following table summarizes the funding provided for FY 2015:

Summary of Ca	pital Improvement Funding				
	FY 2015	% of FY 2015			
Agency/Institutions	Funding	Funding Total			
USHE	\$54,740,698	58.5%			
UCAT	4,074,250	4.4%			
State Agencies	34,719,022	37.1%			
SUBTOTAL	\$93,533,970	100.0%			
Statewide Programs	5,139,400				
Unallocated Balance	1,570,230				
GRAND TOTAL	\$100,243,600				

- Because total needs far exceed available funds, even in good economic times, narrowing the list of requested projects to the highest priority needs is a significant challenge for the State Building Board.
 For FY 2015 USHE requests exceeded the funding provided by more than \$66 million.
- The Statewide Programs Fund (\$5,139,400 for FY 2015) is used to deal with Building Board staffing and facility condition audit costs, energy efficiency program funding, and statewide needs that surface during the year (e.g., planning studies, Hazmat issues, DFCM preventative maintenance projects). Higher education institutions can qualify for these funds in any given year.
