UTAH BOARD OF HIGHER EDUCATION
STRATEGIC PLAN
Update

July 16, 2021
**Priority**

**Board’s Role**

**Goal**

**Strategy**

**System Unification**

- Develop, strengthen, and leverage a seamless and articulated system of higher education

**Access**

- Remove structural barriers to entry

**Affordability**

- Remove structural barriers to affordability

**Completion**

- Remove structural barriers to graduation

**Workforce Alignment**

- Increase availability and stackability of high-demand, high-wage programs

**Priority**

**Board’s Role**

**Goal**

**Strategy**

**System Unification**

- Develop, strengthen, and leverage a seamless and articulated system of higher education

**Access**

- Increase the college-going rate of high school grads by 3% in 5 years
- Increase the college-going rate of underrepresented groups by 4% in 5 years

**Affordability**

- Increase student ability to pay cost of attendance
- Ensure institutional cost of attendance remains within the standard of affordability year over year
- Develop an expanded standard of affordability by the end of 2021
- Develop a cost structure model to compare the cost of delivering degrees and awards for each USHE institution by the end of 2021
- Structure awards to facilitate completion and transfer
- Increase FAFSA completion
- Increase awarding of credit for prior learning

**Completion**

- Increase timely completion of degrees and awards by 3% in 5 years
- Increase the timely completion of underrepresented students by 4% in 5 years
- Increase completion rate of graduates in high-demand, high-wage programs by 7% in 5 years
- Increase completion rate of underrepresented groups in programs aligned with high-wage, high-demand jobs by 8% in 5 years

**Workforce Alignment**

- Increase availability and stackability of high-demand, high-wage programs

**Priority**

**Board’s Role**

**Goal**

**Strategy**

**System Unification**

- Develop, strengthen, and leverage a seamless and articulated system of higher education

**Access**

- Remove structural barriers to entry

**Affordability**

- Remove structural barriers to affordability

**Completion**

- Remove structural barriers to graduation

**Workforce Alignment**

- Increase availability and stackability of high-demand, high-wage programs
Timeline

• Aug. 1 – Finalize project plans for each tactic
• Sept. 1 – Integrate all plans into project management system
• Sept. 8 – Host full staff retreat for the Commissioner’s office
• Sept. 17 – Present first progress report at Board meeting
Part 1: Executive Staff
- Develop a collective, high-level understanding of what success looks like for each tactic
- Identify project developers

Part 2: Project Developers
- Identify specific milestones and timeline for next 12 months
- Determine office resources needed
## Priority: Account Growth

Costs and student loans are the biggest barriers to college for Utah students

Fewer than half feel confident navigating the application and financial aid process

Utah Board of Higher Education
July 16, 2021
Ari Bruening | ari@envisionutah.org
Jason Brown | jbrown@envisionutah.org
Executive Summary

Envision Utah surveyed more than 7,600 Utah high school students about their educational experiences and plans after high school.

More results to come.

Students perceive costs and student loans as the biggest barriers to post-secondary education.

• This is true for every demographic group.

• Students over-estimate the amount of debt college graduates carry and have relatively low tolerance for college debt.

The process of applying for college and financial aid is a significant barrier to post-secondary education.

• Less than half of students feel confident navigating the application/financial aid process.

• Students think that simplifying the application/financial aid process would have a bigger impact than making college free.

Students of color don’t feel like campuses are welcoming.

More students plan to pursue post-secondary education than actually do.
Methodology

Two-Phase Research Process

• 3-day qualitative study via iTracks discussion board
  • 25 students from diverse backgrounds
  • 30 open-ended questions
  • Approx. 70 minutes of input per participant

• Survey of high school students
  • > 7,600 student respondents; 4,500-student sample used in analysis
    • Random response selection based on Census data and Utah schools enrollment data
  • Opt-in survey with incentives — distributed by districts, Youth Council, Keys to Success, others
  • Respondents representative of Utah’s racial/ethnic demographics
Costs & student loans are the biggest barriers to post-secondary ed.
Utah students see **costs and student loans as the biggest barriers to post-secondary achievement among their peers.**

**Q:** What do you see as the biggest barriers to going to college, either for yourself or others? Please rate these barriers on a scale of 1 to 7.
More than half of Utah students believe that they will graduate from college with more than $20,000 in debt.

Q: Approximately how much student debt do you think the average Utah college student graduates with?

According to LendEDU, the average student debt load in Utah is the lowest in the nation at $16,633.
But, roughly 70% of Utah students believe it is unacceptable to have more than $10,000 in student loan debt after graduating from college. 1 in 5 believe no amount of debt is acceptable.

Acceptability of Student Loans

<td>11%</td>
</tr>
</tbody>
</table>

Q: Approximately how much college debt do you personally think is acceptable to have after graduating?
A majority of students believe that people with bachelor’s degrees make between $10,000 and $50,000 more than people with only high school diplomas. Non-college goers tend to think the gap is smaller.

High School to College Salary Gap Estimate

According to the Salt Lake Chamber, the median earnings of bachelor’s degree recipients is $21,200 more than the median earnings of high school graduates.

Q: The average salary in Utah for someone with only a high school diploma is about $38,000. Approximately how much higher do you think the average Utah salary is for someone with a bachelor’s degree?
Students don’t feel confident navigating higher ed logistics.
Standardized tests, not knowing what to study, and a lack of information about applying to college are all significant barriers to post-secondary education.

Q: State and education leaders have proposed a lot of ideas to help more students enroll in and complete some kind of education after high school. How effective do you think the following ideas would be? Please rate them all on a scale of 1 to 7.
Students of color aren’t all sure colleges are welcoming to them.
Black and Latinx students do not believe as strongly as Utah students on average that colleges are welcoming to people like them.

"College environments are welcoming to people like me."

More students plan to enroll in college than actually do right after HS.
80% of Utah students plan to complete some kind of education after high school. Only about 67% enroll in a post-secondary institution within 5 years of college.

Q: What are your education or career plans after high school (or after a gap year/church mission)?

According to USHE, 67% of high school graduates enroll in a post-secondary institution within 5 years of graduation.
Many Utah students feel their plans for education post-high school have been disrupted by COVID-19.
Roughly one in three Utah students say the pandemic has affected their post-secondary plans.

Q: Has the pandemic affected your plans for education or work after high school?
Nearly half of Hispanic/Latinx students say COVID-19 has affected their post-secondary plans compared to only a third of average Utah students.

Q: Has the pandemic affected your plans for education or work after high school?
Potential Strategies for Exploration

• Expand the College Advising Corps
• Develop common USHE application
• Develop college success courses in collaboration with LIA, USBE, and USHE
• Explore automatic enrollment in or acceptance to open-enrollment schools for graduating HS seniors
• Increase concurrent enrollment among high schoolers who would be first-gen college students
Potential Strategies (Cont’d)

• Require FAFSA completion upon high school graduation (with necessary exemptions)
• Create a standard student identification and tracking system across Utah LEAs & USHE
• Adapt relevant college programs to offer credentials after students’ first year
Envision Utah How we grow matters.
USHE
Non-Traditional Students in Utah
July 2021
Agenda

• Background Information and Justification of Need

• Best Practices for Supporting Non-Traditional Students

• Cicero Survey Results & Alignment with USHE Strategic Pillars

• What’s Next?

• Questions / Comments
Background Information and Justification of Need
Anticipated declines in traditional student enrollment are well documented. In the absence of attracting and retaining non-traditional students, Utah institutions of higher education will suffer...

**Key Takeaways:**

- Current demographics trends, exacerbated by COVID-19 implications, have dramatically impacted current and projected college enrollment rates
- This trend is expected to have long consequences for the education gap as low income and minority students are most significantly affected
- Higher education institutions have already begun to see the impacts of lower enrollment and face critical, long-term decisions

---

1 – Source: National Student Clearinghouse Research Center Term Enrollment Estimates 2014-2021
3 – Source: “Knocking at the College Door 10th Edition” Western Interstate Commission for Higher Education
...but attracting non-traditional students is about much more than institutional survival; it is also a social imperative. Successfully serving non-traditional students will accelerate social justice for Utah’s women and diverse ethnicities. Below is just one of many examples: 25–35-year-old women...

Utah Women Aged 25-35 in Higher Education

- **40% less likely** to be enrolled in post secondary education compared to men
- When married, **79% less likely** to be enrolled in post secondary education compared to married men
- With children under 5, **31% less likely** to be enrolled in post secondary education compared to men with children under 5

While Utah has relatively similar enrollment and degree completion rates for men and women in the “traditional student” demographic, there is a **significant discrepancy** between men and women in the **25-35 age range**. Additional factors such as marriage status widen this gap even further.

Sources: Utah Women in Higher Education, 2000-2017
...One more example of the social imperative in serving non-traditional students is the fact that nationally, students of color saw a precipitous drop in college enrollment during the last year, particularly at two-year colleges.

Sources: “College enrolment and Retention in the Era of COVID,” College Board Research
We know from research conducted for Utah in 2011 that post-secondary degrees and certificates have meaningful positive economic, social and personal / familial impact in Utah...

### Economic

- Mean personal annual compensation is 75% greater among those with a degree or certificate.
- Degree or certificate holders are 2.6 times more likely to work in salaried jobs (rather than hourly).
- One quarter (23%) of those without a postsecondary degree or certificate have experienced more than two years of total post-high school unemployment, compared to 9% of those with a degree or certificate.

### Social

- Postsecondary degree or certificate holders are 11% more likely to report happiness with their life than those without a degree or certificate.
- Individuals who completed degrees or certificates are 9% more likely to indicate that they have great marriages and are 6% more likely to characterize themselves as having a good family life.
- Degree or certificate holders are 11% more likely to report good health than non-degree or certificate holders.
- Individuals without a degree or certificate are more than twice as likely to have utilized Medicaid, WIC, and CHIP in the last five years, and over three times as likely to have utilized food stamps.

### Personal & Familial

- Individuals with at least one parent with a degree or certificate are 50% more likely to complete a degree themselves.
- If a sibling has completed a degree or certificate, individuals are twice as likely to complete a degree themselves.

Sources: Prosperity 2020 Report
...and according to research conducted in 2018 we know some of the observable variables that best predict whether a non-traditional student will succeed and complete a degree or certificate.

Strong predictors of success are:

**Academic Background**
- Students who have taken more English, Math and STEM courses
- The number of credits that will be accepted by the institution
- Students who have been out of school for longer

**Attitude and Perceptions**
- A higher degree of confidence in their personal abilities and likelihood to succeed academically
- A belief in the value and brand of the institution

**Educational Experience**
- Interest to actively participate in a learning community or student mentor group
- A clear understanding of their motivations for pursuing a higher education

Sources: WGU Segmentation Study
Finally, research from 2012 is very compelling surrounding the primary process obstacles non-traditional students encounter as they attempt to complete a degree or certificate.

Non-Traditional Student Top 5 Pain-Points Not Adequately Addressed by the Institution

<table>
<thead>
<tr>
<th>Pain Point</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Navigating the application and financial aid process</td>
</tr>
<tr>
<td>2.</td>
<td>Transferability of past credits earned, and competency obtained</td>
</tr>
<tr>
<td>3.</td>
<td>Course scheduling flexibility</td>
</tr>
<tr>
<td>4.</td>
<td>The quality of online courses (student learning vs. cost-savings for the institution)</td>
</tr>
<tr>
<td>5.</td>
<td>Selecting the right major and classes that result in the best possible job</td>
</tr>
</tbody>
</table>

Additional Pain Points Include:

- Academic support and mentoring
- Parking accessibility

Institutions are aware of these priorities. The discrepancy lies in what students view as adequate vs. what the institutions view as adequate. The gap in these areas is severe. Significantly more hands-on support and guidance is required.

Sources: Bill and Melinda Gates Foundation. National study conducted by Cicero Group of tens of thousands of students, prospects, and university and college employees.
Overlaying data from the 2019 American Community Survey with findings from the 2011 statewide study, SUGGESTS that there may be ~220,000 individuals in Utah who have five or more semesters completed without a degree or certificate.

**Key Takeaways:**
- Nearly 20% of students with some college and no degree completed four years (eight semesters) of college.
- 25% of individuals who attended 8 or more semesters but did not complete a degree or certificate listed balancing work with school as the leading cause for non-completion.

**Sources:** American Community Survey (2019); Prosperity 2020 Study
Best Practices for Supporting Non-Traditional Students
Peer-reviewed studies provide evidence-based practices for how institutions can customize financial aid to propel non-traditional students

Financial Aid Best Practices for Supporting Non-Traditional Students

**Affordability Requirements**
Require that low-income students not pay more than a predetermined percentage of their discretionary income

**Method of Aid**
Experiment with providing aid equivalent to 125% of the needed time to finish; accrue funding as courses are completed

**Simplify Application**
Base the awarding of grants on documents and information more easily obtainable for non-traditional students; three-year average income verified by tax returns; lock in candidate’s data for entirety of program with one simplified annual form to update if income has changed in prior year

**Incentivize**
Experiment with offering students small “bonuses” when they accomplish milestones or goals

“When students see evidence that people at their university care about them, students feel more motivated than when they perceive stakeholders only care about students identified as the majority.”

Sources: Breaking with Tradition—Making Federal Grant Aid Work for Today’s Students. 2015; Supports for Nontraditional Students in Higher Education: A Summative content Analysis Using a Corpus-Based Approach
Survey Results & Alignment with USHE Strategic Pillars
To gather more meaningful information about the perceptions of the survey participants, Cicero segmented them into four groups to evaluate different demographics and their specific needs.

**Background**

- Understand the *needs, perceptions, and obstacles* of prospective non-traditional students in Utah
- Collect information around the *structural barriers* for these students to **starting or returning** to complete their degree / certificate
- Provide insight to USHE / WGU on how to **best attract and support** non-traditional students

**About Survey Respondents**

- N=830
- Variety of Education Levels
- Aged 25+
- 60% Female
- 86% White
- Average Income: $75K

**Age**

Three segments based on age: Young Adult (25-34 years old), Middle Aged (35-49 years old), and Older Adult (50+ years old)

**Education**

Segmented into three groups depending on their highest education level achieved: High School / Technical College, College Stopout, and College Degree

**Minority**

Segmented into two groups based on race: Minority (Asian, Black, Hispanic, Native American, and Native Hawaiian) or Non-Minority (White)

**Socioeconomic Status (SES)**

Four segments based on SES, which was determined by income level, marital status, and having children under 18 years old
To better understand the implications and outcomes of the research, we have bucketed key findings into the four pillars of the USHE 2021 Strategic Plan

We have all this information.. **NOW WHAT?**

Aligning with four of USHE’s Pillars from the 2021 Strategic Plan, let’s look through the lens of each of the four demographic segments exploring key takeaways, similarities, differences, and supporting data from the survey.

- **Access**
  - Remove Structural Barriers to Entry

- **Affordability**
  - Remove Structural Barriers for Affordability

- **Completion**
  - Remove Structural Barriers to Graduation

- **Workforce Alignment**
  - Increase Availability and Stackability of High-Demand, High Wage Programs
## ACCESS | Remove Structural Barriers to Entry

### AGE

1. **Cost:**
   - Nearly 40% of each age group **worries about cost**
   - Over 60% of Young Adults believe cost will be $20K+

2. **Time:**
   - Middle-Aged adults are the most concerned about **finding time for a degree**

3. **Perception of Obstruction:**
   - Older Adults expressed **least** concern overall—indicating **actual concerns are vague**

### EDUCATION

1. **Cost:**
   - ~60% of people think education cost will be <$20K yet cost is still primary barrier
   - College Stopouts have **higher perception of cost** than other education backgrounds—likely because of types of degrees pursued

2. **Financial Aid Process:**
   - Those without college experience are **most deterred by financial aid processes**

### MINORITY

1. **Cost:**
   - Minority groups are **more likely** to believe the cost is >$20K compared to Non-Minorities

2. **Acceptable Grades:**
   - Notable concern of Minorities: **confidence in maintaining acceptable grades**

3. **Language Barrier:**
   - English as a non-primary language impacts 15% of Minority individuals; for 7% of Minority individuals, it is the #1 barrier

### SOCIOECONOMIC STATUS

1. **Knowing Where to Begin:**
   - Lower SES groups **know less where to begin their journey** (36%) compared to the Upper SES groups (5%)

2. **Rigor of Program:**
   - Students in Upper SES have more confidence in their ability to handle the rigor of the program; 16% of Upper SES expressed concern compared to 30% of Lower SES
62% of all respondents said they agree or strongly agree that the value of an education is greater than the cost.

**Cost**
- 89% of College Stopouts say cost is an obstruction to pursuing higher education.
- 65% of Older Adults, compared to 38% of Young Adults, believe the cost will be under $20K.
- Individuals in the Middle-Low SES subsection had the highest proportion of respondents who believed the cost of their program would be greater than $50k.

**Financial Aid**
- 72% of Minority individuals listed navigating the financial aid process as a primary barrier in pursuing their program.
- 73% of individuals with High School / Technical College experience also listed navigating the financial aid process as a primary barrier in pursuing their program.
College Stopouts say the following prevented them from completing their degree / certificate:

- **47%** Family & Work Responsibilities
- **25%** Could No Longer Afford Tuition
- **22%** Uncomfortable with Student Loan Debt
- **18%** Personal Health or Medical Complications
- **17%** Lack of Support from Family or Friends

**Age**
- 43% of Middle-Aged Adults are worried about how to pay for their program and the time commitment that their program requires

**Education**
- 51% of College Stopouts don’t know how they would pay for a college program or certificate
- Only 16% of HS / Tech College reported disrupting their current employment as a barrier for working on a degree or certificate

**Minority**
- For both Minorities and Non-Minorities, the time commitment to complete a program and the difficulty in maneuvering through the financial aid process were consistently both meaningful obstacles

**SES**
- Consistent concerns across all groups include time commitment and managing demand of work responsibilities while enrolled in a program
- 30% of Lower SES are concerned about rigor of program compared to 16% of Upper SES
**Important Factors in Choosing a School**

- Older and Middle-Aged Adults expressed the importance of an education with a *customizable pace* and *online coursework*
- 59% of College Stopouts reported a college’s *ability to customize the pace* of their degree as important
- Minority students rank *reputation* as most important factor when selecting a school
- Flexibility with pace and platform is most important factor for Lower SES when selecting a school

**Degree/Certificate Preference**

- 55% of Middle-Aged candidates prefer to attend an *online college* or university, while 49% of Young Adults want a 4-year university
- 47% of Minority students prefer to attend an *online college or university*
- 46% of Lower SES students prefer to attend school at a *traditional 4-year university*

**Type of Program & Mode of Study**

- Young, Middle-Aged, and Older Adults all prefer *schooling that is part time with hybrid learning*
- Those with High School / Technical College prefer *online school* compared to hybrid
- Non-Minorities are not as concerned about having the option to choose between online and in-person options as minorities
- Members of each *socioeconomic status prefer part-time and hybrid modes of study*

**Preferred Program/Major**

- Business and Computer & Information Sciences majors are the most popular across age groups and SES statuses
- Those with a High School / Technical College degree or certificate are likely to pursue certificates for personal services (nail artist, esthetician, etc.)
- Minority students prefer to study *healthcare* and medicine compared to Non-Minorities who are more likely to go into *education*
A Voice of the Customer study encompassing postsecondary students of all ages, with focus on institutions and students specific to Weber and Davis counties, has been commissioned by Alan Hall and will be presented at a future USHE meeting.

Preliminary findings on specific ways to better serve non-traditional students from this study include:

**Schedule Flexibility**
- Schools that offer a **variety of class times and formats** can better serve the range of needs expressed by non-traditional students.
- This is a key consideration for students identifying and **selecting a program** that works for them.

**Admissions**
- Non-traditional students with relevant work experience would benefit from **modified admission criteria** and processes.
- Employers cite **prior work experience** as very helpful for both graduates and prospective students who may benefit from additional education.

**Application through Enrollment**
- The application through enrollment process can be complex and having a **single point of contact** is helpful.
- Reducing anxiety and providing proactive assistance is important for non-traditional students who are unsure about navigating an unfamiliar system.

**Mentorship**
- Professors and other school personnel who take a **mentorship role** with students can have a big impact.
- This is especially true for non-traditional students navigating challenges outside the classroom.

"As a non-traditional student, I chose Weber State because of the **flexible schedule**. The available class times allowed me to complete my studies and be there for my kids at home."

"I have a lot of caregivers (employees) that would make excellent nurses but have **lower grades**. Schools are very competitive, and if they’d consider relevant work experience it’d really help these students."

"Davis Tech had a **pre-admission advisor** who walked me through everything I needed to do before school started – it was so nice. I didn’t feel any anxiety that I was going to miss something."

"I talked with my instructor about **family issues** I was facing, but he didn’t work with me. If he’d helped me better understand the school’s system, I wouldn’t have had to pause my studies."
Thank you!

Questions?
Motion

• I move that we appoint Mindy Benson as interim president of Southern Utah University, effective July 26, 2021.
Policy R312, Degree-granting institutional roles and missions

Basic categories established in statute
Board of Higher Education defines and clarifies (most recently: August 2020)
“Role”

- The general category within which an institution fits as described in Utah Code §53B-16-101, Establishment of Institutional Roles and General Courses of Study (R312 3.1).
Three types of degree-granting institutions

**Research Universities**
- University of Utah
- Utah State University
  - includes regional campuses

**Regional Universities**
- Weber State University
- Utah Valley University
- Southern Utah University
- Dixie State University

**Community Colleges**
- Snow College
- Salt Lake Community College
“Mission”

• Written statements of the general purposes and functions of various institutions approved by the Board (R312 3.2).
Approval process for updated mission statements

1. Institutional Board of Trustees.

2. Board of Higher Education’s Academic Education Committee
   a. Determine fit with institutional role
   b. Forward to full Board if appropriate

3. The Board decides whether to approve and amends Policy R312 to reflect the approved changes
Regional universities

• Role: emphasize teaching, scholarly work, creative achievements, and community service
• Student access: open-access; student success is supported through developmental programs and services associated with a comprehensive community college.
• Fill regional or state workforce demands
• Community outreach: leading contributor to the quality of life and economic development at the local and state levels
Types of awards and degrees allowed

• Pre-baccalaureate Certificates
• Post-baccalaureate Certificates
• Associate Degrees
• Bachelor Degrees
• Select Master Degrees
Update to Weber State University’s Mission Statement
Weber State University provides transformative educational experiences for students of all identities and backgrounds through meaningful personal connections with faculty and staff in and out of the classroom. The university promotes student achievement, equity and inclusion, and vibrant community relationships through multiple credentials and degree pathways, experiential learning, research, civic engagement, and stewardship.

Trustee-Approved Mission Statement
Assessment of Fit within Regional University Role

✓ Provides career and technical education, undergraduate associate and baccalaureate programs, and select master’s degree programs
✓ Academic programs fill regional or state workforce demands
✓ Transfer programs allow students to seamlessly seek degrees at other institutions within the system.
✓ Student success is supported through developmental programs and services associated with a comprehensive community college (dual mission role).
✓ Emphasizes teaching, scholarly work, and creative achievements that complement teaching and community service.
✓ Contributes to the quality of life and economic development at the local and state levels.
Motion

• I motion to amend Board Policy R312 to include the proposed change to Weber State University’s mission.

Weber State University provides transformative educational experiences for students of all identities and backgrounds through meaningful personal connections with faculty and staff in and out of the classroom. The university promotes student achievement, equity and inclusion, and vibrant community relationships through multiple credentials and degree pathways, experiential learning, research, civic engagement, and stewardship.
Definition of “polytechnic”
R312-5. Polytechnic Education: Degree-granting institutions may adopt a polytechnic educational model, which is a student-centered, comprehensive, interdisciplinary, applied learning model that integrates the liberal arts with intensive science, technology, engineering, and mathematics programs and that prepares graduates for professional careers in collaboration with regional industry partners to meet local economic needs.

5.1. Institutions that adopt a polytechnic educational model have not altered their statutory and Board designated roles and shall maintain strategic planning, academic programs, communications and marketing that reflect those roles.
Motion

- I motion that Board Policy R312 be updated to include the definition of “polytechnic” as noted in the board materials with the following changes: eliminate the words “regional” and “local.”

R312-5. Polytechnic Education: Degree-granting institutions may adopt a polytechnic educational model, which is a student-centered, comprehensive, interdisciplinary, applied learning model that integrates the liberal arts with intensive science, technology, engineering, and mathematics programs and that prepares graduates for professional careers in collaboration with regional industry partners to meet local economic needs.

5.1. Institutions that adopt a polytechnic educational model have not altered their statutory and Board designated roles and shall maintain strategic planning, academic programs, communications and marketing that reflect those roles.
Update to Dixie State University’s Mission Statement
Dixie State University is an open, inclusive, comprehensive, polytechnic university featuring active and applied learning to advance students’ knowledge and skills while fostering competent, resilient, lifelong learners to succeed in their careers and personal lives as creators, innovators, and responsible citizens.
Fit within Regional University role

✓ Provides career and technical education, undergraduate associate and baccalaureate programs, and select master’s degree programs
✓ Academic programs fill regional or state workforce demands
✓ Transfer programs allow students to seamlessly seek degrees at other institutions within the system.
✓ Student success is supported through developmental programs and services associated with a comprehensive community college (dual mission role).
✓ Emphasizes teaching, scholarly work, and creative achievements that complement teaching and community service.
✓ Contributes to the quality of life and economic development at the local and state levels.
Motion

• I motion to amend Board Policy R312 to include the proposed change to Dixie State University’s mission.

*Dixie State University is an open, inclusive, comprehensive, polytechnic university featuring active and applied learning to advance students’ knowledge and skills while fostering competent, resilient, lifelong learners to succeed in their careers and personal lives as creators, innovators, and responsible citizens.*
I move to approve policy R474, Clock-Hour to Credit-Hour Transition..
