DESCRIPTION
of the
UTAH SYSTEM OF HIGHER EDUCATION

The Utah System of Higher Education consists of nine public colleges and universities governed by the State Board of Regents, assisted by local Institutional Councils. The system includes two major research universities, two state undergraduate colleges, and five community colleges. The basic missions of these nine institutions are described below.

University of Utah--The mission of the University of Utah is that of a major urban state university with significant programs of sponsored research and of graduate, professional, and undergraduate education in some 15 colleges and professional schools and their authorized degree programs.

Utah State University--Utah State University serves as the state's land-grant institution under state and federal legislation and is a primary center of university research and of graduate, professional, and undergraduate education in numerous authorized fields of study.

Weber State College--Weber State College has the mission of a large comprehensive undergraduate institution seeking to develop and refine programs and achieve distinction within that mission. Any new graduate programs authorized for the institution will not be oriented toward traditional basic research.

Southern Utah State College--Southern Utah State College has the mission of a four-year undergraduate teaching institution meeting the baccalaureate and assigned vocational training needs of Southern Utah.

Five Community Colleges: Snow College, Dixie College, the College of Eastern Utah, Utah Valley Community College, and Salt Lake Community College have similar missions of open-access comprehensive community colleges addressing area needs with programs of vocational-technical training, transfer and general education, continuing education for personal enrichment or career updating, and student support services--including academic assessment, counseling, developmental remedial studies, and placement. Program offerings and areas of emphasis among these institutions will differ according to various needs and demands of the students and communities served.

Student Financial Aid
A Five Year History

The following tables (1-5) illustrate the number of recipients and dollar amount awarded for the following federal financial aid programs: Perkins Loan (formerly National Direct Student Loan, NDSL) is a low-interest, long-term loan to help pay for postsecondary education; College Work-Study provides postsecondary students the opportunity to earn while they learn; PELL (number of recipients unavailable) is an entitlement program; Supplemental Education Opportunity Grant (SEOG) is available to undergraduates only and does not require repayment; State Student Incentive Grant (SSIG) and the state matching component Educationally Disadvantaged make grants available to eligible students with substantial financial need to enable them to attend or continue their postsecondary studies. The information has been gleaned from Fiscal Operations Report (FISAP) and SSIG Reports that have been submitted, yearly, to the U.S. Department of Education.

Depending on the student "Needs Analysis" and the funds available in each program at individual institutions, a student may receive funds from several financial aid programs thereby presenting a duplication in headcount. For that reason a Total Number of Recipients has not been included.

The Student Exchange Program administered through the Western Interstate Commission for Higher Education (WICHE) and the Regional Education Dental Program (RDEP) assist Utah students in obtaining professional training in dentistry, veterinary medicine, optometry, and podiatry outside the State of Utah. Under these reciprocal arrangements, Utah receives out-of-state students in medicine, physical therapy, pharmacy, architecture, law, and forestry under the interstate compact. Participating students pay resident fees of the receiving state or pay one-third of the regular tuition rate if attending a private institution. The above is a summary of Utah's participation in these programs.

Title II of the Education for Economic Security Act of 1985 authorized grant funds to states to facilitate re-training and in-service training of elementary and secondary teachers in mathematics and science, where a significant portion of the teachers lack adequate subject area expertise. Faculty investigators in the state's public and private higher education institutions request Title II grants funds to sponsor teacher training activities in cooperation with local school districts.

OFFICE OF THE COMMISSIONER OF HIGHER EDUCATION
Associate Commissioner for Finance

Analysis of Faculty Salary and Compensation Comparability
as of 1986-87 and Preliminary Estimates for 1987-88*

Introduction

Each year the Office of the Commissioner prepares a comparative analysis to determine the relative position of faculty salaries and compensation in Utah institutions vis a vis standard sets of comparison institutions. The report is a principle source for determination of recommendations the Commissioner makes, in consultation with the Presidents of USHE institutions, for competitive equity adjustments.

The primary source of information for the analysis was gathered by Maryse Emonerie Associates (MEA) who requested 1986-87 data for faculty salary, tenure, and fringe benefits from every institution of higher education throughout the United States. The information for analysis was collected, processed, and tabulated for the American Association of University Professors (AAUP) by MEA which then submitted it for publication in Academe, March-April 1987. However, for nine of the comparable institutions, data were not included in the Academe report. In four of those cases**, this study includes information obtained directly from MEA report copies supplied to the Commissioner's Office by the individual institutions. In another four cases***, 1986-87 data were obtained via telephone conversations with staff at the institutions. West Chester University, the remaining institution, has been dropped from this year's study until 1986-87 data can be provided.

The latest available data on actual salaries and compensation are for 1986-87. To obtain an estimate of how Utah institutions' faculty compensation in 1987-88 compares with that of their comparison institutions, the Commissioner's Office also obtained information from each comparison institution on average salary increases awarded for this year, and used that information in estimating the current compensation comparisons. Since these average increases percentages were not broken down by rank, it has of course been necessary to use an assumption we know is not totally accurate: that average increases were the same for all ranks. For that reason, the estimated comparisons will be slightly different from actual data when reported for 1987-88, by individual ranks, but they should be very close in total.

* Prepared by Lou Jean Flint and Chalmers Gail Norris

** Eastern Washington University, Jersey City State College, Chemetoka Community College (OR), and Madison Area Technical College (WI)

*** Bergen Community College (NJ), Clark County Community College (NV), Delaware County Community College (PA), Mt. Hood Community College (OR)

The data are analyzed by individual faculty rank for the four-year institutions, and by all faculty combined for the two-year institutions. This is because comparable data by rank are not available at the two-year level, where a majority of the institutions do not use the traditional ranking system. It is important, at the four-year level, to do the analysis by individual ranks, and then aggregate the individual rank differences. This is so because each individual institution has a unique distribution of its faculty members across the ranks. Use of all-ranks averages in determining equity comparisons for a specific college or university would distort the comparison.

A summary of the comparisons for all institutions is provided on pages 3 and 4. The first section on each page shows comparisons on salaries only, and the second section on total compensation. At the bottom of each page the composite equity gap percentages for each institution are shown. The data confirm what generally is known, that faculty salaries in Utah institutions tend to lag behind those in their comparison peer groups, but that fringe benefits in Utah are above average. As a result, the differences in total compensation are significantly less than in salaries alone.

The detail showing information for individual comparison institutions, and a table showing the calculations used in determining the estimated salary and compensation gaps, are provided in the following pages:

University of Utah	Tables 1-A to 3-A	Page 6
Utah State University	Tables 1-B to 3-B	Page 9
Weber State College	Tables 1-C to 3-C	Page 12
Southern Utah State College	Tables 1-D to 3-D	Page 15
Snow College	Tables 1-E to 3-E	Page 18
Dixie College	Tables 1-E to 3-E	Page 18
College of Eastern Utah	Tables 1-E to 3-E	Page 18
Utah Valley Community College	Tables 1-E to 3-E	Page 18
Salt Lake Community College	Tables 1-E to 3-E	Page 18

For each institution, Table 1 presents the estimated salary figures and Table 2 the estimated total compensation figures, respectively, determined by application of the average salary increase percentages obtained directly from each institution to the 1986-87 actual salary figures obtained from the Academe reports or (where missing in the Academe reports) from individual institution reports. The calculations to determine the composite salary and total compensation differences are shown in Table 3 for each institution. Note that differences are calculated individually for each of the four regular faculty ranks in the case of the four-year institutions, and then added together. At the University of Utah and Utah State University, for example, the difference is favorable in the case of Instructors, partially offsetting the unfavorable differences in the case of the other three regular ranks.

Utah Valley Com. Col.	26,600	27,800	1,200	4.51	3.91	4.50
Salt Lake Com. Col.	24,800	26,100	1,300	5.24	5.05	5.15

Normal promotions and replacements of faculty members who leave or retire can result in differences of individual rank average salaries that either offset or enhance the effect of funds awarded for salary increases for continuing faculty members--those employed in 1985-86 and continuing their employment in 1986-87. To a lesser extent, these same phenomena can cause the change in all ranks averages, as shown above, to be more or less than the percentage calculated on the basis of increase amounts actually awarded to continuing faculty members.

* Percentages in Column (f) that are higher than column (e) reflect application of other institutional funds in addition to legislative appropriations.

UTAH SYSTEM OF HIGHER EDUCATION
OFFICE OF THE COMMISSIONER OF HIGHER EDUCATION

October 15, 1987

ANALYSIS OF CLASSIFIED STAFF SALARY
AND COMPENSATION COMPARABILITY*

This report and the attached Appendix A is the updated annual Classified Salary Survey conducted each year. A brief overview of the historical developments follows in the next section. The short methodology section outlines the process that was taken in gathering the data and the basic assumptions used in the analysis. Finally, the results of this years survey are reported as per the recommendation of the Business Affairs Council.

Historical Background

For several years, the three largest institutions of the Utah System of Higher Education have conducted annual salary surveys for classified staff positions. These surveys have been used both for overall marketplace comparisons for budget request purposes and for internal use in the institutions in salary administration.

The Legislative Auditor General (LAG) in 1984-85 was instructed by intent language in the appropriation act to conduct a salary survey for USHE institutions, in cooperation with the Board of Regents and the Legislative Fiscal Analyst. The LAG was not requested to repeat the pilot study, and preferred not to do it. Information on the methodology was supplied to USHE representatives. Under direction of the Business Affairs Council and with general coordination by Leonard Romney in the Office of the Commissioner, the Personnel Administrator's Council of USHE carried out the classified staff survey for 1985-86 for the entire system.

The survey design, patterned after that conducted by the LAG the previous year, was reviewed by a panel of experts chosen from the private sector in Utah and from companies outside the state which specialize in developing and conducting salary surveys. Part of that review also consisted of consultations with representatives of the Legislative Fiscal Analyst and the Governor's Office of Management and Budget.

Methodology

Special attention was given in the 1985-86 study, and again in the 1986-87 and 1987-88 studies, to determine equivalent fringe benefits provisions in order to realistically estimate the relationships between USHE institutions and their marketplaces on total compensation as well as salaries. In addition, great care was exercised to eliminate the benchmark comparison problems for smaller institutions that were of concern in 1984-85.

* Report prepared by Linda Collette and Chalmers Gail Norris. Survey conducted by the Personnel Administrators' Council. Stan Greenhalgh (WSC) deserves special mention for his valuable assistance throughout the study.

Considerable efforts were made by the Commissioner's staff and the Personnel Directors at each institution to assure the appropriate benchmarks were consistently reported and included in the analysis where possible. This step was necessary to assure the year-to-year comparisons appropriately could be made. Finally, after careful evaluation, it was determined to use a statewide marketplace rather than individual institution marketplace comparisons for the small institutions located in sparsely populated regions. This statewide marketplace, used for Southern Utah State College, Snow College, Dixie College, and College of Eastern Utah, includes the combined local marketplaces for Provo, Ogden, Salt Lake, and Logan. At the recommendation of the Business Affairs Council, Utah Valley Community College and Utah State University were compared to the statewide marketplace also. Individual marketplace comparisons were used for Salt Lake Community College, University of Utah, and Weber State College.

The Business Affairs Council, in consultation with Personnel Directors, agreed that for 1986-87 and 1987-88 the surveys would be repeated for the four large market areas and analysis for the four small institutions would be based on relationships to the institutions directly compared to those market areas. It also was agreed that updated fringe benefits comparisons would be done only every few years, and the 1985-86 marketplace ratios between benefits and salaries would be assumed to continue in the intervals between revalidation. Gathering data on benefits imposes a substantial extra burden on respondents in the private sector, which the Council feared would depress the response level if repeated every year.

The basic surveys have been conducted for 1986-87 and 1987-88 by Utah State University (Northern Utah), Weber State College (Greater Ogden Area), University of Utah/Salt Lake Community College (Greater Salt Lake Area), and Utah Valley Community College (Utah County). These data are analyzed in total in preparing the statewide market analysis. Data used for the Greater Salt Lake Area are based on the Radford Study of the Greater Salt Lake Market Area. The University of Utah, in conjunction with the Commissioner's Office, Personnel Directors at other USHE institutions, as well as with others, agreed to base the greater Salt Lake Area market data on the results of the Radford Study because contractual arrangements were already in place for them to conduct a market survey in this area. It was determined to not tax the potential respondents by requesting them to answer two market surveys in order to minimize the impact of the nonresponse rate.

Results

The 1985-86, 1986-87, and 1987-88 surveys by USHE essentially confirmed the findings of the LAG's previous supplemental analysis with regard to fringe benefits and their effect on total compensation comparisons. Data problems experienced in the initial statewide survey with respect to some smaller institutions were eliminated in both the 1985-86 and 1986-87 survey.

1987-88 comparisons by institutions are summarized in the attached Table 1 together with comparisons from the previous two years. The 1987-88 classified staff compensation gaps from marketplace identified in the current survey are as follows:

Classified Salary Survey Results for 1987-88

<u>Institutions</u>	<u>Salary</u>	<u>Compensation</u>
University of Utah	-19.81%	-10.21%
Utah State University	-17.96%	- 8.91*
Weber State College	-28.17%	-17.12%
Southern Utah State College	-24.99%	-13.54%*
Snow College	-16.06%	- 6.27%*
Dixie College	-15.21%	- 6.77%*
College of Eastern Utah	- 7.80%	- 0.65%*
Utah Valley Community College	-14.35%	- 5.01%*
Salt Lake Community College	-15.23%	- 5.34%

*Based on statewide market comparison.

Most of the institutions still face formidable challenges in attempting to catch up to fair and adequate compensation levels for classified staff. However, one institution has been successful in this struggle because the overall compensation gap has significantly narrowed, as in the case of the College of Eastern Utah (-0.65%). Despite the overall compensation gap, certain benchmark positions at this institution are still substantively behind the statewide average for that benchmark.
