General Education Navigator/Academic Year 2025-26

Snow College's General Education (GE) program provides the subject-area knowledge and learning skills foundation for its 2- and 4-year degrees. **Core** and **Institution** courses make up the general education foundation. **Breadth/Knowledge Area** courses give an opportunity to explore various subjects. General education courses are highly advisable for concurrent enrollment students; they are required for college graduation and transferable from one Utah System of Higher Education (USHE) institution to another.

Students completing all **27 (30 if students take HIST 2700 and HIST 2710 in lieu of POLS 1100)** GE credits – *5 concurrent enrollment classes, both junior and senior year,* can earn a ***Snow College Certificate of Completion in General Education*** that is transferrable to all USHE institutions.

1. **Review the class list below with parents and counselors. Follow the instructions in blue to select classes in each GE category.** *Most of the courses on this list are available over Interactive Video Conference (IVC) to all high schools that partner with Snow College with additional face-to-face GE classes available at some individual high schools.*
2. **Speak with experts about GE choices.** 1. Ask a high school counselor which GE classes are available at your school; ask about other ways to fulfill GE requirements (AP, for example). 2. Ask a Snow academic advisor (*snow.edu/ce)* how your course choices will fit different certificate or degree programs.
3. **Are you ready to be a Badger?** *Let's get started. Go to* snow.edu/ce *& contact your Snow College concurrent enrollment advisor today. In addition, check out* myce.snow.edu/ *to "Lookup Classes" available at your high school.*

Which QL Math class is right for you? Select a college math class that fits your college and career path.

Most certificate and all degree programs require students to complete a Quantitative Literacy (QL) class***. You are encouraged to complete QL senior year of high school. Different QL classes provide the math foundation for different pathways.

MATH 1030 – Intro to Quantitative Reasoning	MATH 1040 – Intro to Statistics	MATH 1050 – College Algebra
An appropriate math class for the general studies or liberal arts student majoring in humanities or other programs not related to math and science. The class covers a broad scope of mathematical topics as they apply to real-world problems. Topics include reasoning and number sense, using percents and estimation, math for finance matters such as loans and investments, probability and statistics, and modeling. *MATH 1030 may be the last Math class you take in college.*	Recommended particularly for students in programs desiring statistical literacy, including but not limited to Social Science, Behavioral Sciences, and Nursing (college may require 1040 or 1050). This class includes descriptive and inferential statistical methods. Topics include sampling design, descriptive statistics, linear regression and correlation, probability, sampling distributions, and hypothesis testing and confidence intervals. *MATH 1040 may be the last Math class you take in college.*	Designed for students interested in Mathematics, Science, Engineering, Technology and Business. An in-depth exploration of algebra topics designed to ultimately prepare students for Calculus or further education classes. Topics include functions, including polynomial, rational, exponential, and logarithmic; systems of equations; matrices and determinants; partial fraction decomposition; conics; and sequences and series. *MATH 1050 is the first Math class you will likely take in college.*

***MATH 1010 Intermediate Algebra does not fulfill the QL requirement. It is intended only for students who cannot place into a QL course after completion of Secondary MATH III.
